ABSTRACT

This expanded listing includes many of the dissertations and Masters theses previously listed in the catalog, doctoral dissertations in the Health and Behavioral Sciences. The psychology titles have been placed in a separate publication. Titles in this catalog are listed alphabetically by author under 35 key subject headings. Doctoral dissertations and Masters theses are listed together and each entry carries author, full title, degree earned, school name, date of degree, number of text pages, citation to Dissertation Abstracts International or Masters Abstracts (volume/issue/page number), and the order number for purchase from University Microfilms International. for specific reference material you go to dissertations...

for specific dissertations you go to DATRIX II

More and more business and professional people—as well as students and faculty—
are using dissertations in their research. Shouldn't you be using them too?

Now you can locate and acquire the dissertations you need quickly and easily with Datrix II.
Datrix II is a computerized searching system: an efficient and economical way to find
the right dissertations—fast!

Datrix II uses your carefully chosen 'keywords' in a computer search of the Comprehensive
Dissertation Database which contains complete references to more than 600,000 dissertations.
Master's theses can also be located through Datrix II.

Order a Datrix II search and within one week you'll receive a computer printout of up to 150 citations—
all tailored to your search profile. Each citation includes complete bibliographic information,
reference to the abstract location in Dissertation Abstracts International or Masters Abstracts and the
order number for obtaining full text xerographic or microform copies of the dissertations and theses you need.

Datrix II is the most comprehensive source of dissertation listings, including those just recently published.
And Datrix II is made even more practical by its low cost—only $15 prepaid for up to 150 references.

Request your Datrix II order form by writing to University Microfilms International or
calling the Dissertations Hotline, (800) 521-3042. Complete Datrix II information and ordering
instructions will be included with your order form.

DATRIX II: direct access to dissertations and theses on your subject.

Introduction

This expanded listing entitled *Health Sciences–A Dissertation Bibliography* includes many of the dissertations and masters theses previously listed in our catalog, Doctoral Dissertations in the Health & Behavioral Sciences. We have, however, deleted the Psychology titles and placed them in a new publication entitled *Psychology–A Dissertation Bibliography*. A copy of this companion volume is available, free of charge, on request to University Microfilms International.

The two new volumes mentioned above identify titles of doctoral dissertations and masters theses in the medical and health sciences and psychology accepted by North American Universities between January 1974 and September 1977.

To facilitate access to desired papers, titles in this catalog are listed alphabetically by author under 35 key subject headings. Doctoral dissertations and masters theses are listed together and each entry carries author, full title, degree earned, school name, date of degree, number of text pages, citation to *Dissertation Abstracts International* or *Masters Abstracts* (volume/issue/page number), and the order number for purchase from University Microfilms International. Masters theses can be further identified by the prefix 13 in the order number (e.g. BXH13-09385).

All of the dissertations and theses appear in abstract form in our monthly publication, *Dissertation Abstracts International*, or our quarterly publication, *Masters Abstracts*. Each item is available from University Microfilms International as xerographically-produced bound paper reprints or on 35mm roll microfilm. Dissertation titles with a 1976 prefix (e.g. BXH76-07025) are also available in 98 page format microfiche.

Ordering Information

When ordering dissertation or masters thesis copies supply the order number (including all letters and numbers, e.g., DBG75-0102), author's last name, complete dissertation or thesis title, format and type of binding wanted, billing name and address (on institutional orders only), and shipping name and address. Individuals *must* send a check or money order with their order. Institutions will be billed when their order is shipped; they should use their standard purchase order form, being sure to include the purchase order number and tax exemption number if applicable.

PAPER COPIES

Paper copies of dissertations and masters theses available from University Microfilms International are reproduced xerographically at about 2/3 the original size. They will be perfect-bound and covered in paper. Clothbound copies are available at an additional charge (see Prices below), with author and title stamped in gold on the spine. Unless you specify "cloth binding" (and on prepaid orders include the additional cost) on your order, you will be shipped the standard paper cover.

Pages are printed in numerical sequence by xerography; but, since printing is on one side of a continuous web, the finished copy has printing on the right-hand pages only. Charts, graphs, line drawings, and similar illustrations reproduce quite well. For pages where half-tones and continuous tone enlargements of higher quality are required, photographic prints can be made on request for an additional charge.

MICROFILM COPIES

Dissertations or masters theses can be ordered on 35mm positive (black on white) microfilm made at a reduction of 15-20x. If you prefer this format, be sure to specifically note "microfilm" on your order.

Each month's new dissertation titles. Every month. For a year.

DATRIX ALERT SERVICE

An automatic search subscription

Now you can have automatic access to the most recent listings of new dissertations and master's theses. It's possible through a new search subscription service called Datrix Alert.

Datrix Alert runs 12 monthly searches of the dissertation data base on your choice of 35 subject profiles. Each search takes place as soon as new titles have been added to the Comprehensive Dissertation Database each month.

Subscribe to Datrix Alert and you'll receive a Datrix II computer printout for each search profile you select. The printout tells you the complete dissertation title, author's name, degree awarded, degree year, degree-granting institution, citation (page, volume, issue) for 600-word abstract to be published in Dissertation Abstracts International and Master's Abstracts, and the order number for obtaining full text copies from UMI. All this information for each new dissertation and master's thesis. Every month. For a year.

Datrix Alert is an *annual* subscription. You receive the results of 12 searches per profile for an annual rate of $90.00. Your subscription is payable by check, Master Charge, or VISA. Institutional purchase orders are, of course, accepted.

Datrix Alert means you'll be completely informed of new dissertations and theses up to 45 days before they appear in any printed source. It also means you can acquire a full text copy of any listed title weeks before any index has carried it!

- **The newest titles added every month.**
- **The fastest way to get them.**
- **The most economical way to stay up-to-date — all year.**

Dissertations Hotline

For even more immediate results you can order your Datrix Alert subscription by calling the toll-free Dissertations Hotline. The hotline can also be used when you order full text copies of dissertations or theses. CALL THIS NUMBER ONLY WHEN ORDERING.

For Specific Dissertations You go to the

Comprehensive Dissertation Index.

More and more researchers—from undergraduate students to post doctoral professionals—are using dissertations in their research. Shouldn't your library's patrons be using them too?

Now your patrons can locate and acquire the dissertations they need quickly and easily using the *Comprehensive Dissertation Index (CDI).* CDI features a keyword within subject searching system: an efficient and easy way to identify relevant dissertations—fast!

CDI contains complete references to more than 600,000 dissertations. Each citation includes complete bibliographic information, the location of each work's 600-word abstract in *Dissertation Abstracts International* and an order number for obtaining full text xerographic or microform copies of dissertations your researchers need.

CDI is the only comprehensive printed source of dissertation listings. The original 37-volume set of CDI lists virtually every North American dissertation accepted between 1861 and 1972. Organized in 32 subject volumes and 5 author volumes, this set is up-dated with annual supplements to keep CDI comprehensive and current.

Available in print or microfiche editions, CDI will become an often used reference on your library's shelves.

Receive complete descriptive and price information by writing to University Microfilms International or calling the Dissertations Hot Line, (800) 521-3042. It's toll free.
